PROFILE SUMMARY

Currently pursuing a degree in Information Science and Technology at Temple University with a passion for using technology to solve complex problems. Proficient in programming languages including React, Java, and JavaScript, with a strong foundation in applying these skills to real-world challenges.

CLASSES

Cybercrime	Database Management Systems
Data Structures	Component-Based Software Design
Network Architectures	Client-Side Scripting

TECHNICAL SKILL

React	Cypress
Java	Javascript
SQL	Jest
C#	HTML

EDUCATION

Bachelor of Science in Computer Science

2022 - 2026

Temple University, Philadelphia

GPA: 3.5

CST Dean's list

Clubs:

- Association for Computing Machinery
- E-Sports Overwatch Team

PROJECTS

Community Outreach Presentation

2024

Temple University, Philadelphia

Led community workshops in North Philadelphia to educate locals on technology topics such as VPNs, internet basics, and password security. Developed strong communication skills by breaking down complex technical concepts into simple, relatable explanations for non-technical audiences.

C# Pet Adoption Application

2024

Temple University, Philadelphia

Designed and implemented a Pet Adoption Database and C# application, enabling customers to search for dogs, create accounts, adopt pets, and receive automated adoption emails. Developed advanced employee features, including managing dog profiles, approving applications, and user control, ensuring a comprehensive system for adoption management.

WORK EXPERIENCE

Software Engineer

Suitable.co

4/2023 - 9/2023 and 4/2024 - 8/2024

- Transforming legacy Angular components into modern React components.
- Writing comprehensive Cypress and Jest tests to ensure robust functionality and high code quality.
- Updating and optimizing workflows for CircleCI to streamline the development process.
- Developed a system to rerun failed tests, enhancing reliability and efficiency.
- Implemented a scheduling system to automatically delete unwanted cloud resources through AWS.
